

As the Royal College of Art grows, it is important that its student body thrives as well.

For that, the RCA should be a space where student needs are prioritised and every voice is given equal attention and representation.

**IF ELECTED SU CO-PRESIDENT, I WILL WORK TO ENSURE THAT THE COLLEGE RIGHTFULLY FOCUSES ITS AGENDA ON STUDENT NEEDS.**

### **COMMUNITY**

It is important that students continue to feel a sense of belonging in their expanding college.

If elected SU Co-President, I will advocate for continued *improvement of social spaces across all campuses, as well as transport facilities between campuses* to foster a stronger community environment.

To ensure a strong network of support, I will work with the college to push for *diversity of both the staff and curriculum content*, to reflect the diverse student body.

Furthermore, I will work towards stronger wellbeing support from the college, such as *increased counselling services and disability support*.

### **COMMUNICATION**

It is important that every student knows the resources and opportunities available to them, from sources of support to employability options and visa pathways after graduation.

If elected, I will foster *an SU office that is welcoming and accessible to all students*.

I will work to *improve the way information is passed between the college management and the student body*, ensuring clarity and reach of information for students and increasing the capacity for student feedback.

In addition, to improve the international student experience, I will work to *address the lack of language accessibility for non-native English speakers in the college*.

### **CREATION**

Students want to create and promote their work in a sustainable way, within RCA and beyond it.

As your SU Co-President, I will be dedicated to *upholding the institution's responsibility for providing adequate facilities and infrastructures for students to work*.

I will work with Student Support to *find more ways for increasing institutional support for students facing financial hardships*.

I will also work with Student Support to *create more opportunities and workshops that prepare students for their time after RCA*.
